

## Am Zehnhoff-Söns announces: News from the Trier terminal.

### Future at the Mosel: Unique multipurpose machine in action

Whether in containers and cargo ships, in confined spaces such as warehouses or when handling bulky objects – Meclift™ ML1812R with his hydraulically movable cabin is unique and as of now in use in Terminal Trier. It can lift 18 tons and therefore is perfect for any loading and unloading. ML1812R is environmentally friendly and resource-efficient.

„We use one Meclift ML1812R machine for loading and unloading steel coils into and out of containers in our port.“

Meclift™ ML1812R is an innovative solution for countless transports – maybe for you too?

We are pleased to inform you about the details, you can call us anytime.
