

Am Zehnhoff-Söns reporting: News from Trier.

Dear Customers and business partners,

a few months ago we informed you that the Moselexpress, our Trier train service, has started. Today we are very happy to announce, that after a successful testperiod, we can offer a second train departure! The train service between Rotterdam and the multimodal terminal Trier was accepted very well and we connect Europe's biggest container port once more with the Mosel region.

Maybe this competitive alternative to direct truckings is also an efficient solution for your transports? Let us talk about that! As previously announced the capacity per voyage (Import/Export) is 100 TEU and besides the terminal RWG also ECT Delta is a part of the schedule. Additional terminals and train departures can be offered ad hoc.

It is our pleasure to be there for you, please contact:

Felix Zocher, Sales & BD Intermodal Container Logistics
